IT Bulletin

New Applications

The new **_EdFacts Collect_** application used to update Title I Status is also using a new user authentication application called **_EduAccess_**. Please recognize that your EduAccess username and password are not the same as your Common logon account. Should you require assistance with your EduAccess account please contact the ADE Support Center at (602) 542-7378.

News from the Support Center

The Support Center would like to welcome new team members **Janet King** and **Mea Greenidge**! They are in training, but will be speaking with you when you call the Support Center for assistance.

A **New** and Improved SAIS?

The IT team has launched a new drive to improve SAIS, by upgrading and optimizing its server resources and configurations. The effort is focused on both reducing errors and increasing the speed of the system. If testing is successful, expected to be completed by end April, we would expect to implement changes by late this fiscal year or early next.

Meet Mark Masterson, ADE's Chief Information Officer

Mark brings a wealth of IT experience to his position as CIO and Associate Superintendent here at ADE.

He has served as Deputy Director of Arizona's Government Information Technology Agency, has been a senior partner with Conceptual Technology Services, and was Vice President of IT for DHL. Mark's goal is to bring about constant improvement in the information services that are provided for customers, whether internal or external.

SAIS Reports

Issues with SAIS reports have been resolved. Full Integrity results are available through the normal SDDI Download Area>Student Integrity Status Report.

FY2011 Aggregation and Integrity

The first aggregation run for FY11 is scheduled to run by March 28th. Any updates to this schedule will be posted to the IT Bulletin Board located at https://www.azed.gov/Administrators/ITbb/default.aspx.

Please note that SAIS will no longer be taken offline for aggregation processing so data uploads and reports will still be available during the aggregation process.

Full integrity processing was started on Monday, February 7th.

Over 9 million records were processed.
